BirdDog By Asurio Takes Mobile Inspection and Data Collection To A New Level

www.Asurio.com

BirdDog Overview

One of the Most Versatile, Configurable Mobile Inspection and Data Collection Systems in the Market

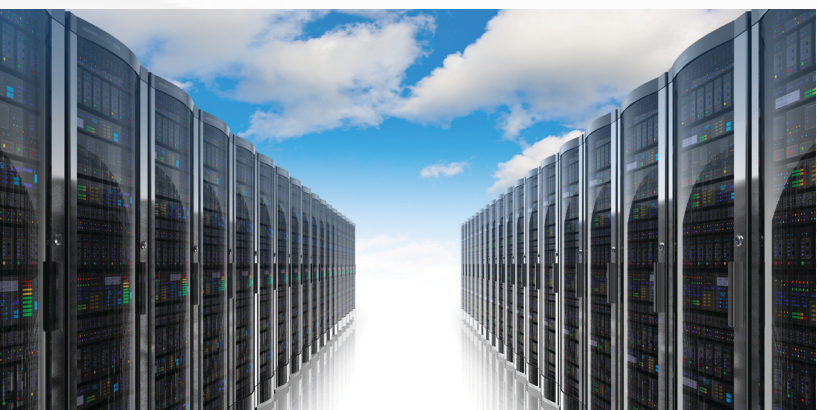

The BirdDog Mobile Inspection and Data Collection System from USA-based Asurio, Inc. is a cloud-based, mobile inspection system that handles inspections and data collection.

BirdDog can be configured for inspections in virtually every industry that requires inspections.

This digital inspection system automates and streamlines:

- Gathering inspection data in the field
- Uploading & synchronizing inspection data
- Managing, sharing & reporting inspection data

Asurio is a Co-sell Ready Microsoft Partner & Uses the Azure Cloud Platform for the BirdDog Inspection System.

BirdDog System Highlights

What is BirdDog?

BirdDog is a cloud-based, mobile inspection and data collection system. Users simply log in to the BirdDog system over the Internet, access their account, and use the software to start streamlining their inspection process.

The benefits to this approach are:

- No software to load on office computers
- No need to spend time on maintenance and software updates
- Affordable for small, mid-sized & large companies and organizations that need to perform inspections

How Does BirdDog Work?

- Field techs conduct inspections using an Android, Apple, or Microsoft tablet.
- When the inspection is completed, the data is uploaded into BirdDog's administrative console.
- BirdDog allows users to generate a variety of inspection reports.
- BirdDog also generates a list of deficiencies and helps automate and streamline the process of resolving deficiencies.
